Forecast for Friday 08 Nov 2024

Weather: Cloudy and overcast with hill fog and patchy drizzle to start. The cloud tending to lift a little during daylight hours with perhaps some bright spells opening up in the northwest of the Park. Cloud then lowering again in the evening. There is a marked temperature inversion due to the dominant high pressure system. This means that some of the highest summits like Pen y Fan could poke above the cloud tops and be cloud free at times, but details around this are uncertain.

Chance of cloud-free hill tops above 600m: 10%, 20% in the northwest and where summits reach above cloud.

Low cloud and visibility: Extensive low cloud, bases 100 to 400m, the lowest bases early and late in the day, especially on southeastern slopes. Summits above 700m free of cloud. Visibility moderate to very poor, in low cloud and drizzle becoming good at times in the northwest during the afternoon. Very good above any cloud.
